Duplocoll® Adhesive Tapes
Seal glass joints easily and inexpensively

Bohle Adhesive Bonding Tapes Bohle Duplocoll®

Duplocoll® is the ideal adhesive tape for sealing glass joints when transparency is especially important, e.g. for all-glass partition walls, in furniture construction or for shower cubicles. The bonds are almost invisible due to the fact that the light refraction index of the tape is similar to that of glass.

Bohle Duplocoll® offers you many advantages and versatile application possibilities:

- For different applications, such as all-glass partition walls, furniture, shower cubicles and much more
- For different materials, such as wood, aluminium, plastic, ceramic or glass
- Considerable time and cost savings
- Very easy and neat application, especially when using the optional applicator (BO 5207939/46)
- Versatile use - Duplocoll® not only bonds, but also seals, dampens, isolates and protects
- Optimum compensation of tolerances and tensions
- Joints are closed in a way that a sealed system is created

The characteristics of Bohle Duplocoll®:

- High transparency due to a light refractive index almost identical to glass
- Antimicrobial effect - inhibits growth of microorganisms
- By sealing the edges of the adhesive tape, Duplocoll® becomes dry after adhesion and resistant to external influences
- Elongation of up to 500% and highly split-resistant
- Resistant to chemicals and softeners
- Very good initial tack, lasting ultimate bonding strength
- Also suitable for rough surfaces: The viscoelastic adhesive film distributes evenly across rough surfaces.
- Resistant to ageing and UV radiation, economic, high quality and does not affect the external appearance of the construction
